How to use Review of Agricultural Entomology

● Either BROWSE, using the CONTENTS

Within each issue, records are sequenced according to their principal subject matter – see CONTENTS page.

About half the records are arranged by CROP or other host plant, so browsing is particularly useful to crop specialists.

● Or SEARCH, using the INDEXES

Subject indexes and author indexes are compiled monthly and cumulated annually.

SUBJECT INDEX

This guides the user to all the records that make significant reference to specific topics, including the following:

INVERTEBRATE SPECIES AND GROUPS

Scientific names are used. These entries provide the most detailed indexing, pointing also to taxonomy, physiology, ecology, biology, distribution, hosts, natural enemies, control, etc. Records that refer only to groups are indexed under group names, e.g. Coleoptera, mites.

HOST PLANT SPECIES AND GROUPS

English common names are used for major crops, scientific names for minor crops and other plants. Entries point also to invertebrates or other subjects. Records that refer only to groups are indexed under group names, e.g. cereals, vegetables.

COUNTRY OR REGION

For records where geographical occurrence is of particular relevance.

AGROCHEMICALS etc.

Including common or chemical names, with cross-references from proprietary names.

PATHOGENS

Scientific names are used for pathogens of invertebrates and plants. Groups such as entomogenous fungi, nuclear polyhedrosis viruses are also indexed.

HABITATS

E.g. forests, grasslands, greenhouses, orchards, pastures, soils. Entries relate particularly to beneficial organisms and environmental effects.

OTHER HEADINGS

The main ones are listed here. Scan the ANNUAL INDEX for a more complete picture.

*Acaricides
*Arthropod pests
*Arthropods

*Terms used to index records that do not refer to specific plants or chemicals.

AUTHOR INDEX

All authors of each paper are indexed alphabetically by surname. Variants of surnames are also indexed.

A TYPICAL RECORD

1) Abstract No.
2) Authors
3) English translation of title
4) Title
5) Journal or other document
6) (Year) Volume (Part) pages
7) Language of text, any other language of summary
8) Address of first author
9) Abstract
10) Preferred name, if the author uses another name.

A survey was carried out on the pests and diseases of carnations in the south east of Spain between 1981 and 1982 and information obtained on the Thysanoptera is reported here. Thrips tabaci accounted for 80% of the Thysanoptera collected. This species was found throughout the year in the coastal zone. T. angusticeps and T. meridionalis [Taeniothrips meridionalis] appeared sporadically in the crop. Populations of thrips were highest in the spring and autumn. Flower colour did not affect the levels of damage.
10

The title should be read as an integral part of the abstract.

TO OBTAIN A COPY OF THE ORIGINAL ITEM

Use the CAB International Document Delivery Service. A form is printed in this issue.

LIST OF JOURNALS CITED

The annual indexes include an alphabetical list of all journals cited during the year.

ABBREVIATIONS

A number of easily understood abbreviations are used (e.g. sp., species). Initial letters may be used for a virus after its full name has appeared. The following are also used:

a.i.	active ingredient	ID	infective dose	*RAE*	*Review of Agricultural Entomology*
concn	concentration(s)	IU	International unit		
d.b.h.	diameter at breast height	KT	knockdown time	RH	relative humidity
DW	dry weight	LC	lethal concentration	SEM	scanning electron microscope
e.c.	emulsifiable concentrate	LD	lethal dose		
ED	effective dose	LD 10:14	10 h light & 14 h dark	ULV	ultralow volume
ELISA	enzyme-linked immunosorbent assay	LT	lethal time	w.p.	wettable powder
		PAGE	polyacrylamide gel electrophoresis		
EM	electron microscope				
FW	fresh weight	PIB	polyhedral inclusion body		

In abbreviations for languages an initial capital denotes the language of the paper, an initial small letter the language of the summary:

Af	Afrikaans	En	English	Ja	Japanese	Pt	Portuguese
Al	Albanian	Eo	Esperanto	Ko	Korean	Ro	Romanian
Ar	Arabic	Es	Spanish	La	Latin	Ru	Russian

The CAB International Institute of Entomology (CIE) is one of the 4 Institutes of 11 Bureaux of CAB International. CIE was founded in 1913 and has provided information and other services for applied entomology since that date, especially by publication of the *Review of Applied Entomology* since 1913 and the *Bulletin of Entomological Research,* first published in 1910.

CIE currently provides the following unique and expanding range of taxonomic services for agriculture, horticulture, forestry, food storage, land management, public health and related subjects.

Taxonomic Services

Identification Services: Rapid identification of harmful and beneficial insects, mites and other arthropods.
Training Courses: Practical instruction in applied taxonomy in the UK and overseas.
Research and Development: Funded taxonomic research projects in support of identification services, reference collections, biological control, integrated pest management, plant quarantine and pest surveys.
Publications: Books, monographs, manuals and maps. Current list available on request.
